MEMORANDUM FOR: Director of Logistics, DDA
Director, Office of Current Production and
Analytic Support, DDI

STAT
FROM:

Chief, Printing & Photography Division
Office of Logistics

SUBJECT: Secure Printing Status

1. This memorandum, which is for information only, provides an update on the status of the Office of Logistics, Printing and Photography Division (OL/P&PD) secure printing activities.

2. As of this date two Xerox 9900s have been installed in the OL/P&PD press room and made operational, the overprint serial numbers have been prepared, and successful production testing has been accomplished. All that remains to be done, prior to commencing actual production, is the installation of infrared ink drying equipment on those presses utilized in the printing of the publications requiring protection. Delivery of the required equipment is scheduled for 21 August 1985, and it is expected that one week will be needed to install and test the dryer. Assuming this schedule is met, OL/P&PD will be ready to provide the secure printing support as requested by the Director, Office of Current Production and Analytic Support, on 2 September 1985.

3. I am at your disposal to discuss this matter further if you need additional information.
